

Legende (deutsche Übersetzung) zur konsolidierten Liste

Zusammenfassung der Fundstellen der im Amtsblatt veröffentlichten harmonisierten Normen – der Richtlinie 2006/42/EG des Europäischen Parlaments und des Rates vom 17. Mai 2006 über Maschinen und zur Änderung der Richtlinie 95/16/EG

Mit der nachstehenden Zusammenfassung werden die Fundstellen harmonisierter Normen, die von der Kommission im *Amtsblatt der Europäischen Union* (ABl.) veröffentlicht wurden, konsolidiert. Sie enthält Angaben, die bereits in der Reihe L oder C des Amtsblatts veröffentlicht wurden, wie in den Spalten (2), (5) und/oder (7) angegeben. Sie enthält alle Fundstellen, bei denen zum Zeitpunkt der Erstellung der Zusammenfassung noch von der Vermutung der Konformität ausgegangen wurde, einschließlich von bereits aus dem Amtsblatt gestrichenen Fundstellen.

Die Dienststellen der Kommission stellen diese Zusammenfassung nur zu Informationszwecken zur Verfügung. Obwohl sie soweit irgend möglich Vorkehrungen treffen, um sicherzustellen, dass die Zusammenfassung regelmäßig aktualisiert wird und korrekt ist, können Fehler auftreten, und die Zusammenfassung kann zu einem bestimmten Zeitpunkt möglicherweise nicht vollständig sein. Die Zusammenfassung selbst entfaltet keine Rechtswirkungen.

Diese Zusammenfassung wurde am 03.08.2023 erstellt.

Erläuterungen zu den Spalten

Referenzinformationen zu Rechtsvorschriften und Normen

- (A) Nummer der einschlägigen Richtlinie oder Verordnung, nach der sie im Amtsblatt veröffentlicht wurde.
- (B) Europäische Normungsorganisation, von der die einschlägige Norm angenommen wurde.
- (C) Nummer einer einschlägigen europäischen Norm oder einer europäischen Norm und ihrer Änderung(en).
- (D) Titel einer europäischen Norm.
- (E) **Typ-A-Normen**

Typ-A-Normen legen grundlegende Begriffe, Terminologie und Gestaltungsleitsätze fest, die für sämtliche Maschinenkategorien anwendbar sind. Die Anwendung derartiger Normen für sich alleine reicht nicht aus, um die Übereinstimmung mit den einschlägigen grundlegenden Sicherheits- und Gesundheitsschutzanforderungen der Richtlinie zu gewährleisten, obwohl sie einen wichtigen Rahmen für die richtige Anwendung der Maschinenrichtlinie bilden und begründet daher keine umfassende Konformitätsvermutung.

Typ-B-Normen

Typ-B-Normen befassen sich mit bestimmten Aspekten der Maschinensicherheit oder bestimmten Arten von Schutzeinrichtungen, die über eine große Bandbreite von Maschinenkategorien verwendet werden können. Die Anwendung der Spezifikationen von Typ-B-Normen begründet eine Konformitätsvermutung mit den hierdurch abgedeckten grundlegenden Anforderungen der Maschinenrichtlinie, wenn aus einer Typ-C-Norm oder der Risikobeurteilung des Herstellers hervorgeht, dass eine durch die Typ-B-Norm festgelegte technische Lösung für die betreffende Kategorie oder für das entsprechende Modell der Maschine angemessen ist. Die Anwendung von Typ-B-Normen, die Spezifikationen für gesondert in Verkehr gebrachte Sicherheitsbauteile enthalten, ergibt eine Konformitätsvermutung für die betreffenden Sicherheitsbauteile hinsichtlich der grundlegenden Sicherheits- und Gesundheitsschutzanforderungen, die durch die Normen abgedeckt werden.

Typ-C-Normen

Typ-C-Normen enthalten Spezifikationen für eine bestimmte Maschinenkategorie. Die unterschiedlichen Maschinenarten, die zu der durch eine Typ-C-Norm abgedeckten Kategorie zählen, weisen

einen gleichartigen Verwendungszweck auf und sind durch gleichartige Gefährdungen gekennzeichnet. Typ-C-Normen können auf Typ-A- oder Typ-B-Normen verweisen, wobei angegeben wird, welche der Spezifikationen der Typ-A- oder Typ-B-Norm auf die betreffende Maschinenkategorie anwendbar sind. Wenn für einen bestimmten Aspekt der Maschinensicherheit eine Typ-C-Norm von den Spezifikationen einer Typ-A- oder Typ-B-Norm abweicht, haben die Spezifikationen der Typ-C-Norm Vorrang gegenüber den Spezifikationen der Typ-A- oder Typ-B-Norm. Die Anwendung der Spezifikationen einer Typ-C-Norm auf der Grundlage der Risikobeurteilung des Herstellers, ergibt eine Konformitätsvermutung mit den grundlegenden Sicherheits- und Gesundheitsschutzanforderungen der Maschinenrichtlinie, die durch die Norm abgedeckt sind. Bestimmte Typ-C-Normen sind als eine aus mehreren Teilen bestehende Reihe aufgebaut. Teil 1 enthält allgemeine Spezifikationen für eine Maschinenfamilie und andere Teile der Norm enthalten Spezifikationen für bestimmte zu dieser Familie gehörende Maschinenkategorien, durch die die allgemeinen Spezifikationen von Teil 1 ergänzt oder abgewandelt werden. Für Typ-C-Normen, die nach diesem Schema aufgebaut sind, ergibt sich die Konformitätsvermutung mit den grundlegenden Anforderungen der Maschinenrichtlinie aus der Anwendung des allgemeinen Teils 1 der Norm in Verbindung mit dem einschlägigen spezifischen Teil der Norm.

Datum und Amtsblattfundstelle für die Vermutung der Konformität

- (1) Datum, an dem eine Konformitätsvermutung in den Fällen beginnt oder begonnen hat, in denen eine Fundstelle ohne Einschränkung im Amtsblatt veröffentlicht wurde. Dieses Datum entspricht in der Regel nicht immer dem in Spalte (2) angegebenen Referenzdatum.
- (2) Fundstelle und Datum einer einschlägigen Veröffentlichung in der Reihe L oder C des Amtsblatts, in den Fällen, in denen eine Fundstelle ohne Einschränkung im Amtsblatt veröffentlicht wurde.

Datum und Amtsblattfundstelle für die Vermutung der Konformität mit Einschränkung

- (3) Im Amtsblatt veröffentlichte Einschränkung zur Einschränkung einer Konformitätsvermutung – dies schließt Einschränkungen aufgrund förmlicher Einwände ein.
- (4) Datum, an dem eine Konformitätsvermutung mit Einschränkung in den Fällen beginnt oder begonnen hat, in denen eine Fundstelle mit Einschränkung im Amtsblatt veröffentlicht wurde. Dieses Datum entspricht in der Regel, jedoch nicht immer, dem in Spalte (5) angegebenen Datum.
- (5) Fundstelle und Datum einer einschlägigen Veröffentlichung in der Reihe L oder C des Amtsblatts, in den Fällen, in denen eine Fundstelle mit Einschränkung im Amtsblatt veröffentlicht wurde.

Datum und Amtsblattfundstelle für das Ende der Vermutung der Konformität

- (6) Datum der Beendigung einer Konformitätsvermutung.
- (7) Fundstelle und Datum einer einschlägigen Veröffentlichung in der Reihe L oder C des Amtsblatts, in den Fällen, in denen das Datum der Streichung im Amtsblatt (Datum in Spalte (6)) veröffentlicht wurde.

EUROPEAN COMMISSION

Directorate-General for Internal Market, Industry, Entrepreneurship and SMEs

Ecosystems III: Construction & machinery
Standards policy

Brussels, 3.8.2023

Summary of references of harmonised standards published in the Official Journal – Directive 2006/42/EC¹ of the European Parliament and of the Council of 17 May 2006 on machinery, and amending Directive 95/16/EC

The summary below consolidates the references of harmonised standards published by the Commission in the *Official Journal of the European Union* (OJ). It reproduces information already published in the L or C series of the OJ as indicated in columns (2), (5) and/or (7). It contains all references which, when the summary was generated, still provided a presumption of conformity together with references already withdrawn from the OJ.

The Commission services provide this summary for information purposes only. Although they take every possible precaution to ensure that the summary is updated regularly and is correct, errors may occur and the summary may not be complete at a certain point in time. The summary does not as such generate legal effects.

This summary was generated on 3 August 2023

Column legend

Reference information on legislation and standards

- (A) Reference number of a relevant Directive or Regulation under which it was published in the OJ
- (B) European standardisation organisation that adopted the relevant standard
- (C) Reference number of a relevant European standard or of a European standard and its amendment(s)
- (D) Title of a European standard
- (E) A-type standards

A-type standards specify basic concepts, terminology and design principles applicable to all categories of machinery. Application of such standards alone, although providing an essential framework for the correct application of the Machinery Directive, is not sufficient to ensure conformity with the relevant essential health and safety requirements of the Directive and therefore does not give a full presumption of conformity (OJ L 194, 2.8.2023).

B-type standards

B-type standards deal with specific aspects of machinery safety or specific types of safeguard that can be used across a wide range of categories of machinery. Application of the specifications of B-type standards confers a presumption of conformity with the essential health and safety requirements of the Machinery Directive that they cover when a C-type standard or the manufacturer's risk assessment shows that a technical solution specified by the B-type standard is adequate for the particular category or model of machinery concerned. Application of B-type standards that give specifications for safety components that are independently placed on the market confers a presumption of conformity for the safety components concerned and for the essential health and safety requirements covered by the standards (OJ L 194, 2.8.2023).

C-type standards

C-type standards provide specifications for a given category of machinery. The different types of machinery belonging to the category covered by a C-type standard have a similar intended use and present similar hazards. C-type standards may refer to A or B-type standards, indicating which of the specifications of the A or B-type standard are applicable to the category of machinery concerned. When, for a given aspect of machinery safety, a C-type standard deviates from the specifications of an A or B-type standard, the specifications of the C-type standard take precedence over the specifications of the A or B-type standard. Application of the specifications of a C-type standard on the basis of the manufacturer's risk assessment confers a presumption of conformity with the essential health and safety requirements of the Machinery Directive covered by the standard. Certain C-type standards are organised as a series of several parts, Part 1 of the standard giving general specifications applicable to a family of machinery and other parts of the standard giving specifications for specific categories of machinery belonging to the family, supplementing or modifying the general specifications of Part 1. For C-type standards organised in this way, the presumption of conformity with the essential health and safety requirements of the Machinery Directive is conferred by application of the general Part 1 of the standard together with the relevant specific part of the standard (OJ L 194, 2.8.2023).

Dates and OJ references for establishing a presumption of conformity

- (1) Date when a presumption of conformity starts or started in cases where a reference was published in the OJ without restriction. This date is usually, but not always, the same as the OJ reference date in column (2)
- (2) Reference number and date of a relevant publication in the L or C series of the OJ in cases where a reference was published in the OJ without restriction

Dates and OJ references for establishing a presumption of conformity with restriction

- (3) Restriction published in the OJ to restrict a presumption of conformity – this includes restrictions on the basis of formal objections

- (4) Date when a presumption of conformity with restriction starts or started in cases where a reference was published in the OJ with restriction. This date is usually, but not always, the same as the date in column (5)
- (5) Reference number and date of a relevant publication in the L or C series of the OJ in cases where a reference was published in the OJ with restriction

Dates and OJ references for ending a presumption of conformity

- (6) Date when a presumption of conformity ends or ended
- (7) Reference number and date of a relevant publication in the L or C series of the OJ where the date of withdrawal from the OJ (date in column (6)) was published
